

Monthly Update – As at March 31, 2022

Diversiflex Plus

This portfolio takes a relative strength investment approach that seeks to provide above-average returns with significant downside protection.

Inception date:	October 1, 2012
Minimum investment:	\$50,000
Benchmark:	50% S&P/TSX Composite 50% MSCI World (CAD)
Investment time frame:	Medium term or longer

INVESTMENT STRATEGY

- Employs a relative strength approach to capture growth opportunities in up markets while offering protection in down markets.
- Exposure to a wide range of asset classes that include Canadian, U.S. and international equities, individual equity sectors, fixed income, cash, commodities and currencies.
- Sophisticated daily analysis is used to drive the decision to rotate into or out of asset classes and their individual holdings, when warranted, in an effort to achieve stronger returns and capital protection.

- The BMO Equal Weight Banks ETF (ZEB) was the second weakest performer for the month, with a -2.19% return.

The war in Ukraine continued to be front-and-center for investors, as geopolitical uncertainty contributed to ongoing turbulence in stock markets. A growing list of government-imposed sanctions against Russia, including a U.S. ban on Russian imports of oil and energy, and a myriad of major U.S. companies ceasing operations in Russia spurred fears of further disruptions in supply chains and higher levels of inflation. The exacerbating crisis in Ukraine did not derail the Federal Reserve from initiating what is expected to be a series of interest rate hikes this year, as it raised rates by 25 basis points, marking the first time the central bank has hiked rates since 2018. Fed Chair Jerome Powell left open the possibility that more aggressive rate hikes moving forward, with FOMC officials anticipating a further six hikes through the balance of 2022. Major equity indices reacted favorably to the tightening and the possibility of a ceasefire negotiation between Russia and Ukraine, bringing the S&P 500 up 8% from its lowest point of 2022. Despite the month-end rally, Q1 was the worst quarter for stocks in since 2020.

SIA Equity Action Call

INVESTED IN YOU.

iaprivatewealth.ca

*The BMO SIA Focused North American Equity Fund utilizes SIA Wealth Management's relative-strength methodology and will target fifteen individual North American securities while equities are in favor; however, the fund could hold as little as zero equity positions when equities are unfavored. SIA Wealth Management, who acts as sub advisor for the Diversiflex portfolios also acts as sub advisor for the BMO SIA Focused North American Equity Fund.

**Calculated using change in month end values for the trailing 3 and 5 year periods (annualized for 12 months per year).

Performance is calculated using month-end market values of the model portfolio. Since we use a model portfolio to calculate performance, there are no client-initiated cash flows (deposits/withdrawals) to account for. Performance is calculated by dividing the change in the model portfolio's market value by the model portfolio's market value at the beginning of the performance period. Also, any and all income generated by the portfolio's holdings are held within the model portfolio in cash and is accounted for in the portfolio's month-end market value – this results in a total return measure of the model's performance. Returns for periods less than 1 year are shown as periodic returns while returns for periods greater than 1 year are annualized. The Diversiflex Portfolios are managed and operated through iA Private Wealth Inc., a member of the Canadian Investor Protection Fund and the Investment Industry Regulatory Organization of Canada. iA Private Wealth is a trademark and business name under which iA Private Wealth Inc. operates.
